CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
DEVANG PATEL INSTITUTE OF ADVANCE TECHNOLOGY & RESEARCH
Department of Computer Engineering

Subject Name: Web Development Framework
Semester: III
Subject Code: ITEU204
Academic year: 2025-26 [ODD]

Practical File

No.	Aim of the Practical
1&2.	**Problem Definition:1** Initiate the "Project Title" by defining scope, key pages (min. 10), and layout with HTML skeletons. **Problem Definition:2** Design a fully responsive layout for the portal home, about, and registration pages using CSS and Flexbox/Grid. **<u>PROGRAM CODE :</u>** <!DOCTYPE html> <html lang="en"> <head> <meta charset="UTF-8" /> <meta name="viewport" content="width=device-width, initial-scale=1.0"/> <title>Home page</title> <link rel="stylesheet" href="index.css">\ <style> body { font-family: Arial, sans-serif; margin: 0; padding: 0; background-color: #f5f7fa;

```
}

OUTPUT:

Figure:13 Faq page

CONCLUSION:

The project defined the scope and structure of a student portal by creating semantic HTML layouts and a sitemap for smooth navigation (CO1). Responsive design principles using CSS Flexbox/Grid and media queries were applied to ensure usability across devices (CO2). Overall, the work improved skills in requirement analysis, wireframing, and responsive UI

	design, forming a strong foundation for future portal development.

3	**Problem Definition:**
	Create a user registration page with frontend validation using HTML5 and JavaScript.
	PROGRAM CODE :
	<script>
	document.addEventListener("DOMContentLoaded", function () {
	const form = document.querySelector("form");
	
	form.addEventListener("submit", function (e) {
	let isValid = true;
	
	document.querySelectorAll(".error-message").forEach(el => el.textContent = "");
	
	const name = form.fullname.value.trim();
	const mobile = form.mobile.value.trim();
	const birthdate = form.birthdate.value;
	const address = form.address.value.trim();
	const school = form.school.value.trim();
	const gender = form.gender.value;
	
	const mobileRegex = /^[6-9]\d{9}$/;
	
	if (name.length < 3) {
	document.getElementById("name-error").textContent = "Full Name must be at least 3 characters.";
	isValid = false;
	}
	
	if (!mobileRegex.test(mobile)) {
	document.getElementById("mobile-error").textContent = "Enter a valid 10-digit mobile number starting with 6-9.";

```
        isValid = false;
      }

      const birth = new Date(birthdate);
      const today = new Date();
      if (!birthdate || birth >= today) {
            document.getElementById("birthdate-error").textContent = "Birthdate
cannot be today or in the future.";
        isValid = false;
      }

      if (address.length < 10) {
        document.getElementById("address-error").textContent = "Address should
be at least 10 characters.";
        isValid = false;
      }

      if (school.length < 3) {
          document.getElementById("school-error").textContent = "School Name
must be at least 3 characters.";
        isValid = false;
      }

      if (!gender) {
         document.getElementById("gender-error").textContent = "Please select a
gender.";
        isValid = false;
      }

      if (!isValid) {
        e.preventDefault();
      }
    });
  });
```

```
</script>
```

PROGRAM CODE :

```
<script>
function validateForm() {
  const mobile = document.getElementById("name").value.trim();
  const seatnumber = document.getElementById("seatnumber").value.trim();
  const email = document.getElementById("email").value.trim();
  const password = document.getElementById("password").value.trim();
  const error = document.getElementById("error-message");
  error.innerText = "";

  const mobileRegex = /^[6-9]\d{9}$/;
  const emailRegex = /^[^\s@]+@[^\s@]+\.[^\s@]+$/;

  if (!mobileRegex.test(mobile)) {
```

```
    error.innerText = "Invalid mobile number. It must be 10 digits and start with 6-
9.";
    return false;
  }

  if (seatnumber.length < 6) {
    error.innerText = "Seat number must be at least 6 characters.";
    return false;
  }

  if (!emailRegex.test(email)) {
    error.innerText = "Invalid email address.";
    return false;
  }

  if (password.length < 6) {
    error.innerText = "Password must be at least 6 characters.";
    return false;
  }

  return true;
}
</script>
```

OUTPUT:

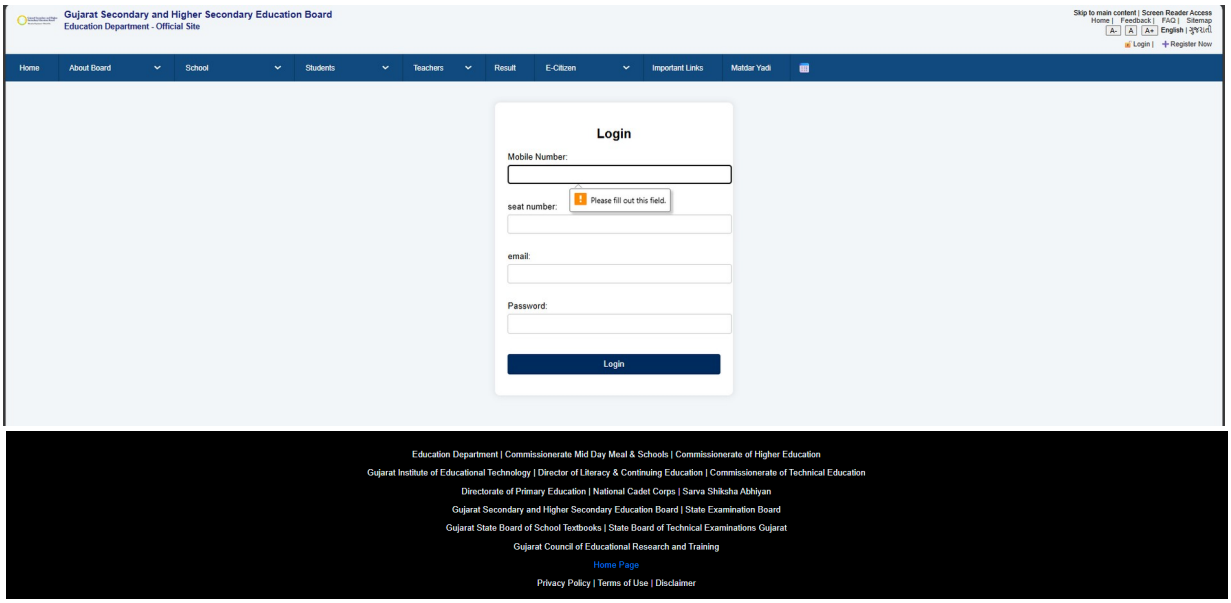

Figure:3.2 Login page

CONCLUSION:

The registration page was successfully designed using HTML5 and JavaScript with effective frontend validation for required fields, input types, and error handling. Additional features like a password strength meter improved usability and security. This task enhanced skills in form design, accessibility, and validation logic, providing a practical foundation for real-world registration and data entry systems.

4

Problem Definition:

Create dynamic content such as collapsible FAQs, popups, and sliders in portal

PROGRAM CODE :

```
<script>
  // Popup
  const popupBtn = document.getElementById("popupBtn");
  const popup = document.getElementById("popup");
  const popupOverlay = document.getElementById("popupOverlay");
  const closePopup = document.getElementById("closePopup");
```

```
  popupBtn.onclick = () => {
    popup.style.display = "block";
    popupOverlay.style.display = "block";
  };

  closePopup.onclick = popupOverlay.onclick = () => {
    popup.style.display = "none";
    popupOverlay.style.display = "none";
  };

  // Slider
  let currentSlide = 0;
  const slides = document.querySelectorAll(".slide");

  function showSlide(index) {
    slides.forEach((slide, i) => {
      slide.classList.toggle("active", i === index);
    });
  }

  document.getElementById("next").onclick = () => {
    currentSlide = (currentSlide + 1) % slides.length;
    showSlide(currentSlide);
  };

  document.getElementById("prev").onclick = () => {
    currentSlide = (currentSlide - 1 + slides.length) % slides.length;
    showSlide(currentSlide);
  };
</script>
```

OUTPUT:

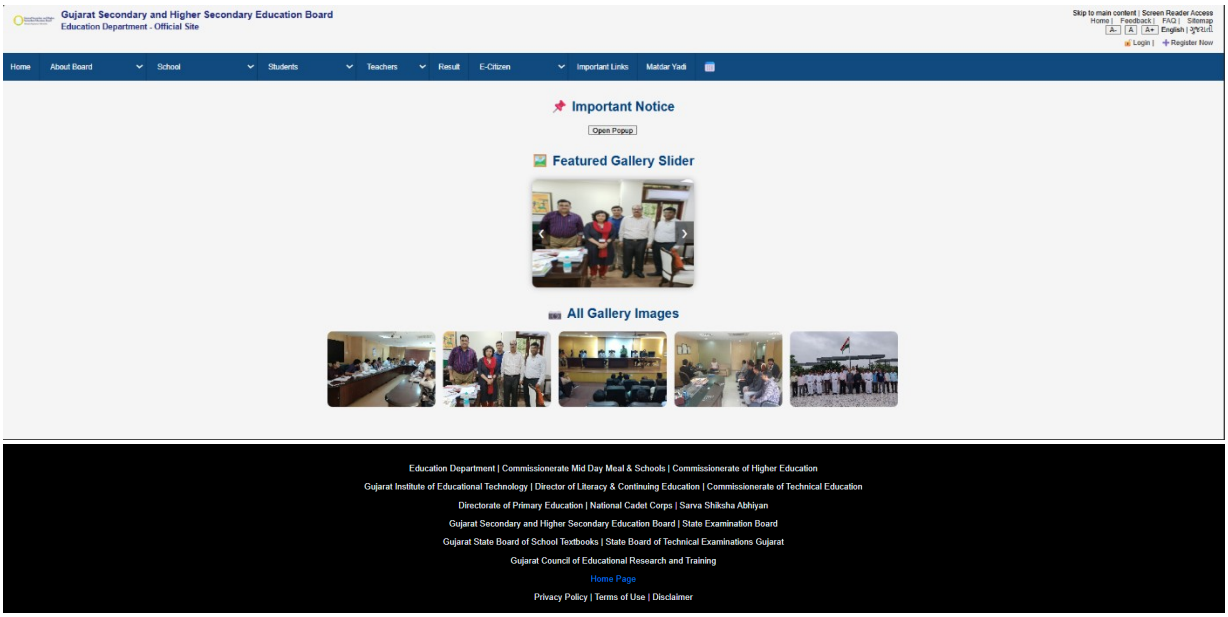

Figure:4.1 Slider page

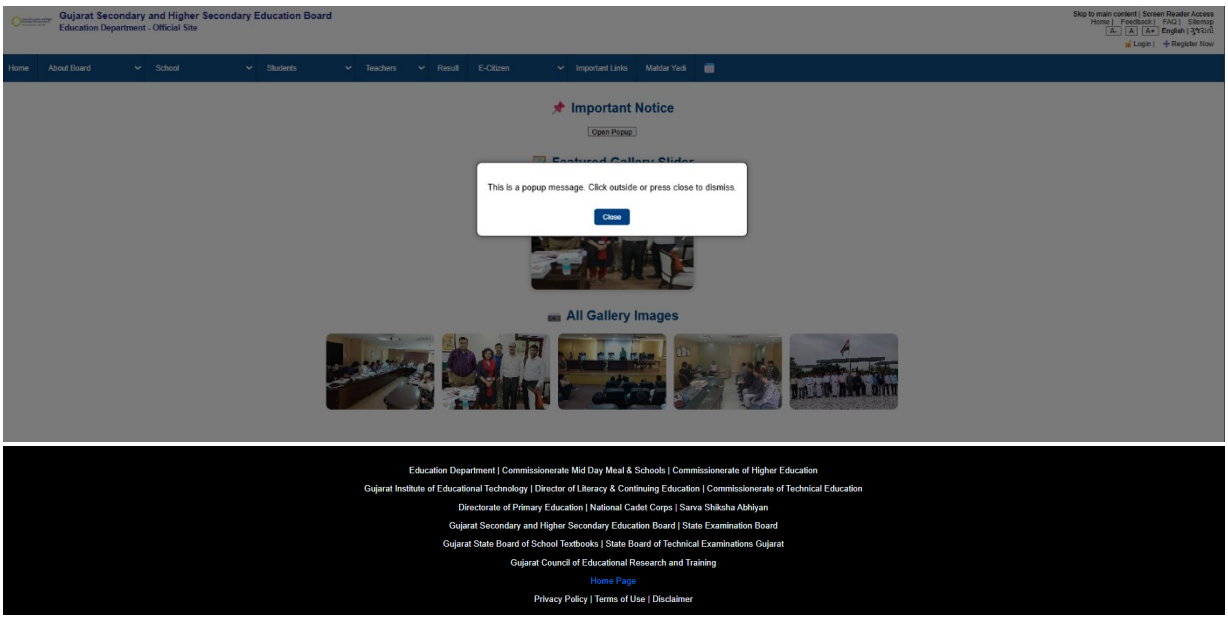

Figure:4.2 Popup page

PROGRAM CODE :

```
<script>

    document.querySelectorAll(".faq-question").forEach(q => {
  q.addEventListener("click", () => {
```

```
      const answer = q.nextElementSibling;
      answer.style.display = answer.style.display === "block" ? "none" : "block";
    });
  });
  </script>
```

OUTPUT:

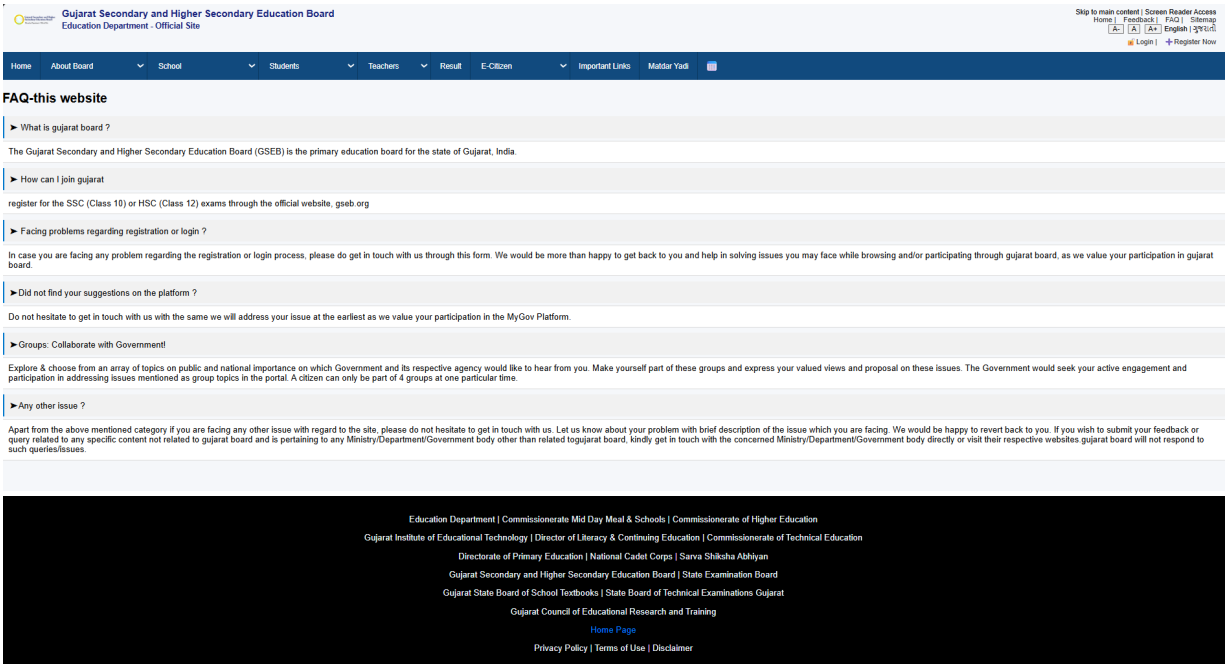

Figure:4.3 Faq page

CONCLUSION:

Dynamic content such as collapsible FAQs, popups, and sliders was implemented using JavaScript DOM manipulation and event handling to improve interactivity and usability. These features enhanced the portal's user experience by making content more engaging and accessible. The task strengthened skills in DOM selection, event-driven programming, and UI enhancement, laying the groundwork for more advanced interactive dashboards.
